Hello Benjamin Matlock,

The California Geological Survey (CGS) has received a Notice of Preparation for a Subsequent Environmental Impact Report (SEIR) for the City of Yucaipa Freeway Corridor Specific Plan. This email conveys the following comments from CGS concerning geologic issues related to the planning area:

1. Fault Rupture Hazards

The CGS has mapped an Alquist-Priolo Earthquake Fault Zone (EFZ) for the Chicken Hills Fault Zone within the planning area. A review of the existing EIR indicates the EFZ for the Chicken Hills Fault Zone is not accurately depicted. When preparing the SEIR, the City should review maps and GIS data at the links below and revise the extent of the Chicken Hills Fault Zone as appropriate:

<https://maps.conservation.ca.gov/cgs/EQZApp/app/>

<https://maps.conservation.ca.gov/cgs/informationwarehouse/index.html?map=regulatorymaps>

If you have any additional comments or questions, please feel free to call or email.

Erik
